PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8806 SESSION NUMBER: 1
DATE OF SESSION: 16 FEB 88 DATE OF REPORT: 16 FEB 88
START: 1319 END: 1420
METHODOLOGY: CRV VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: See tasking data sheet, attached.
2. (S/NF/SK) VIEWER TASKING: The entire session was conducted utilizing Stage 6 tools in conjunction with a map of Lebanon (supplied). The session was conducted in four parts:
 - 1) Using the horse racing track (335245N/353045E) as a reference point, 003 determined the direction to Terry Waite-present location. (see diagram labeled p.2a). 003 perceived the location to be in a southwest direction from the track.
 - 2) Next, using the athletic field (335230N/352955E) as a reference point, 003 again attempted to determine direction to the target; results indicated a SSE direction (p.2b).
 - 3) 003 was then instructed to locate and describe a landmark structure close to the target, and then to sketch the site with both the landmark and the target building in the sketch.
 - 4) 003 next turned attention fully to a perception/description of the target structure (see summary). 003 places this somewhere in the vicinity of 335230N/353020E.
3. (S/NF/SK) COMMENTS: It is interesting to note that both 003 and 011 (on 5 Feb 88, target #5056) describe the target person "sitting, with head in hands". Also, although 003 places the target in a different part of the city (using Stage 6 tools), all other data matches that supplied by at least two other viewers (011 and 095) working against this same target (#5056/8806).

Initial site impressions involve a built-up area with a specific structure that is white, masonry in construction, two floors above ground, with a courtyard sort of area to the side which itself is bounded on the opposite side by another structure. The structure of interest has what seems to be a red or reddish-brown curved-tile roof which is close to being flat. In front of the structure, which further has the sense of having originally been intended as a residence, is a narrow street or alley, with "like" cobblestone paving. Structures across the street and on either side abut or are contiguous one with another. Inside the structure of interest it is dirty and virtually empty of furniture. There are stairs to the second floor. On the second floor are two to three rooms and an open area. In one of the rooms are at least two people, maybe one or two more; one at least is ~~holding his head in his hands~~. There is an ~~atmosphere of boredom~~ and of ~~sitting for something~~ indeterminate to finally happen, but it is ~~unpleasant~~ because the timetable, if any is unknown, and whatever is expected could happen now or never, or anywhere in between. The general neighborhood is ~~shadowy~~, and feels under-populated--not quite abandoned, but those who live here avoid being in the open when possible and do not congregate in groups. There is a person on the roof of the neighboring structure "as if" he were ~~standing~~, is bored with ~~watching~~, but knows that he's necessary because you never know when something might happen.

A nearby structure of interest is old, domed, rounded, white, masonry, white, with arches; inside it is cool, dim, with sunstreaks shining in. Impression of it being a mosque in a ~~heavily congested~~ urban area with tall structures in the background. Somewhere in the vicinity is the impression of an ~~unidentified "storage" structure~~ suggestive of a water tank on stilts. In front of the domed structure is an open "plaza" area that is flat, approximately rectangular, cobbled. Structure of interest is only a few blocks from this nearby structure. It is located in a place that is not where one would reasonably expect it to be; not where interested parties would be likely to search for it.

~~SECRET~~ NOFORN

1. PROJECT: 8806 (5056-D)

2. BACKGROUND: Previous search conducted via WRV revealed the viewer's perspective of the location of Terry Waite in Beirut, Lebanon.

3. ENCRYPTED COORDINATES: 773001/248403

4. ESSENTIAL ELEMENTS OF INFORMATION (EEI):

a. Access and describe the location and structure where Terry Waite is currently being held captive.

b. Identify a single manmade or natural structure, place, or thing, that is readily recognizable and located in the immediate area of the target structure where Terry Waite is being held hostage. ✕

c. Submit an overview of a readily recognizable structure located in the immediate vicinity of where Terry Waite is being held in captive.

d. Utilizing a map of Beirut, pinpoint the structure where Terry Waite is currently being held captive.

---PROVIDE SUMMARIES AND SKETCHES IN SUPPORT OF YOUR VIEWING

---ONCE THE EEI HAVE BEEN FULFILLED, VIEWER MAY USE A MAP TO IDENTIFY THE LOCATION OF SPECIFIC INTEREST.
